> Open | Agnostic | Secure

ViewSonic offers total solutions for education – **ViewBoard**, our series of front of class interactive flat panel displays, and **myViewBoard**, a hybrid cloud-based digital whiteboard software ecosystem.

We aim to offer the right mix of EdTech elements combining security, flexibility and user-centric applications for modern pedagogies; giving teachers the digital tools they need and freeing up their valuable time and resources.

Engagement

Allow students to connect and interact with classroom content in real time, from any location.

Creativity

Use interactive software to draw on-screen for more engaging presentations.

Productivity

Efficient wireless screen sharing, quick access to content, and two-way interaction.

In a typical lecture class, students are attentive just **40%** of the time

65% of the people are visual learners
Visuals are processed **60,000** times faster than text

Collaboration can increase innovation by up to **15%**

> The Next Generation of EdTech

ViewSonic believes that the most effective EdTech resource is an empowered teacher. Therefore, the next generation of EdTech is on a mission to provide holistic solutions to educators through interoperability, streamlined communication, and improved user experience.

Share Annotations
on a bigger Screen

The short-throw projector
simultaneously syncs your teaching
materials from the ViewBoard S via
HDBaseT or HDMI.

Interactive displays
that replace traditional IWBs
or interactive projectors.

Highlight Features & User Benefits

Front-facing teaching via the ViewBoard S

- The ViewBoard S allows teachers to maintain eye contact with the classroom while utilizing the combination of touch and a projected image.

Enhanced engagement with intuitive annotation

- Write and draw with a log free experience.
- Annotate on top of any app.
- Encourage group interaction.

Enhanced Management from single source

- Manage the content and defaults of multiple ViewBoards on the intranet.
- Control multiple HDMI devices.
- Compatible with Crestron/Extron/AMX/SureMDM.

Case Study

Ashford School, UK

The director of e-learning from Ashford School in the UK chooses the ViewBoard II P/550 and ViewBoard S as the go-to lecture tools to engage with students both on campus and remotely.

Queensland University of Technology (QUT), Australia

The eSports training lab at the Queensland University of Technology in Australia is able to stay ahead of the competition by using our ViewBoard IPP6550 interactive display.

> A SCALE-UP Classroom

The collaborative nature of a SCALE-UP classroom for top project-based learning encourages more in-depth group discussions among students. Teachers play a coaching role and facilitate the students' learning process.

Huddle Station

Smaller size ViewBoards or non-touch presentation displays to facilitate creativity and sharing during group discussions.

Central Teaching Station

The instructor can manage which student's work to showcase.

Presentation Zone

The ViewBoard interactive display amplifies student and teacher presentations while encouraging peer collaboration in any type of class setting.

Building a SCALE-UP classroom

Assign topics for group presentations

- Conveniently cast out the classroom materials to the HuddleStation displays. *

Active group discussion

- Any student can easily mirror their BYOD content *
- Enhance discussions with a simple switch of annotation/digital tag under whiteboard mode. *

Present and feedback

- Quick drag and drop to share screen content *
- Promptly provide two-way feedback between teachers and students. *

* Remote, seamless use of ViewBoard hardware device and software/app will be required to enable the usage.

Case Study

Mobile County Public School, USA
The science lab was updated with our ViewBoard IFP7550 to encourage active learning in the district.

Vanderbilt University, USA
The ViewBoard IFP8650 interactive display is used in discussion groups at the world-renowned Vanderbilt University.

> myViewBoard™, a hybrid cloud-based whiteboard solution

Presentation

Facilitate an engaging environment by presenting your rich content from the cloud and distribute it to any internet connected device or display, simultaneously.

Participation

Stay on the same page with a multitude of whiteboarding and audio-visual tools. Students can take pop quizzes and share their inputs in the form of documents, images, and videos.

What makes for an engaging lesson?

Preparation

Make your lessons stand out with illustrative diagrams and materials. Import a wide range of lesson assets from Google G Suite, Microsoft Office 365, Smart Notebook, Active Inspire, and other digital whiteboard solutions.
